## Introduction

Ten years back during a journey along with Guruji he desired somebody to re-write another volume of Brighu Nandi Naadi with the charts and details collected by him from Rishi Vakya, a copy he gave it to me. This is a huge work and needs extraordinary efforts and strain.

I had then told him that I may be interested to write a book on detailed transit based on his book. He was happy and when we reached his house, he gave me two dried dates that is prasada of the deity which he was worshiping. Right from that period, the efforts and planning was going on to write this book. Despite disappointments and discouragements and delay, ultimately the work commenced when I met Mr. Vamshi Krishna a student of mine who took interest and pains to take dictation from me. This gave me ample time to think and design this work. I must thank him for his help.

Being just an instrumental in this work of divine revelation, the contents needs no prelude or explanation by an ordinary mortal like me.

With the grace of “His majesty” and Guruji now this book is ready and is in the hands of genious blessed souls like you.

I am thankful to all those who ecnourgaed me and also thankful to Sagar Publications beautiful presentation of this Book.

How to read this book.

1.Note the Yogas in the Natal Chart

2.Read the Results of Primary transit

3.Read Primary transit on a Natal Planet + the Destiny breaker

4.Find the link of other planets for matters of life and read the results

5.Read the simultaneous transit of other planets transit over natal planets and merge the results with slow moving planets transit results.

This method gives wide scope for delineating the transit results.

# chapter 02

## Rules of Transit - Naadi Astrology

1.We must have the time chart (that is the chart at the time of reading the horoscope) ready to read the transit results. We must have the degrees of planets.

2.We must note when a planet entered into the Sign and when he would be crossing a planet in the same sign and when he will be crossing the sign.

3.If the planet is retrograde we must note the time when it became retrograde and when he will be straight. If the Transiting planet is in retro he may deny results due to obstruction and may give results after becoming straight. In the same sign 4. We must note the combustion of planet because the combust planet cannot influence any results. He may give results after combustion.

5.The result may vary due to exchange of planet in Natal chart. Transiting planet may give result of the planet on which it is transiting and later it may give the result of planet in exchange in Natal chart. Or there could be combined results. For example if Venus and Saturn are in

exchange and Jupiter is transiting on Saturn, he may get the Job and later he may get married. If Jupiter is transiting on Venus he may get first marriage or an affair later he may get a Job.

6.There can be exchange in Transit planets too. For example Jupiter is transiting on Saturn which has exchange with Mars. He may get a job and may face tensions or the job can be of technical nature. However the problem exists. If Jupiter is transiting on Mars native may face problem in getting job and he may get difficult jobs.

7.There can be exchange between Natal and Transit planets. Jupiter Transiting in Saturn house and Natal Saturn is in Jupiter’s house. He may get the Job or promotion.

8.Retrograde planet may give results of the planet posited in its rear sign, provided it has not granted results fully while he is transiting that previous sign. If any balance he would give now during retro period. This normally happens because the Transiting planet loses its strength in previous sign hence may skip or partially give results.

9.Planets in Stambana (stagnant) especially Mars when it takes more than 6 months in a sign will get retrograde and straight. The results of the planet will be very significant. The results shall be either good or bad for material matters based on the planets involved in Natal chart. Enemy planets

and the combinations especially with health matters are to be carefully studied.

10.If the Natal planets enemy to the Transiting Planet give bad results during its transit. Once they cross the degrees of Natal planet they stop giving bad results. If there are friendly planets in natal chart in places 7th, 5th & 9th the bad effects are reduced.

11.On the contrary if the transiting planet encounters friendly planets there can be good results provided if the the sign is not weak either to trasntng planet or to the Naltal planet or if there are no enemy either to transiting or natal planets in 1, 5, 9 & 7th

**Rider for Rule 11**

a.Generally a planet gives results of the planet on which it is transting and if there is oppostion from enemy planet either to transting or natal planets, then the transtng planet prefers to give results of Natal Planets posited in 2- 6-10, 4-8-12, 3-7-11 from his exalted or own houses

a.A transting Planet may also give results from 2- 6-10, 4-8-12, 3-7-11 places from Natal planets if these signs are own or exalted signs of Natla Planets.

12.It is not just the stipulated friendship and enmity between the planets. The harmony and disharmony of the matters signfifed between them is of utmost importance for considering compatibility.

13.There is a technical snag in considering the transit of planets based on modern computer computations. In general hypothetical moments are nearer to accuracy in reading results. That is considering 12 years one round for Jupiter and 30 years one round for Saturn, 18 years for Rahu and Ketu.

14.One more secret, is that if you are seeing the Jeevakaraka like Jupiter for native Venus for Wife or female native, Sun for father, Moon for Mother, Venus for sister/wife (to be seen after marriage), etc., we should equate these planets with Jupiter and rotate similarly (rotate them as 12 years a round)

15.The same logic with a difference may be applied for material matters signified by the planets. (For example education: During schooling period, say from Nursery to 10th every year the Mercury can be rotated and see the planets that encounters. Friendly planet will give success and enemy planets will results in failures and Equal planets may give success with remedial or hard work.

16.If it is an interview fixed on a day rotate mercury from natal postion on daily basis till the date of interview that gives the position of intelligence of the native on that day. For precision you can rotate Mercury from the days moved postion on hourly basis till the time of interview. It gives the position of “Intellignce” on that hour. Now see the commencing time of Hora lord and in the days chart from his positon, move him every sign 5 mintues and the sign in which he is posited at the present time. If the sign lord is compatable to the matter the interview will go well. This can be applied to any matter. If Sun joins, there shall be success). To see diseases rotate Rahu and Ketu and Mars (for injuries and tensions).

17.When there are two or more planets, the transiting planet will be giving the results of all the three one after the other. But results will have qualitative difference based on the friendship and enmity factors that exists among natal planets and also between natal and transiting planets. (Example (Jupiter transiting on Mars, Mercury, Saturn in sequence. Jupiter first encounter Mars, he will have failures in Learning or to understand matters relating to work till he crosses degree of Mars, then he will have Mercury, he may have educational success or interviews/ commercial success since Saturn and Mercury are friends, the effect of Job and work or business is linked to Mercury automatically. Next on Saturn the good effect of profession continues.)

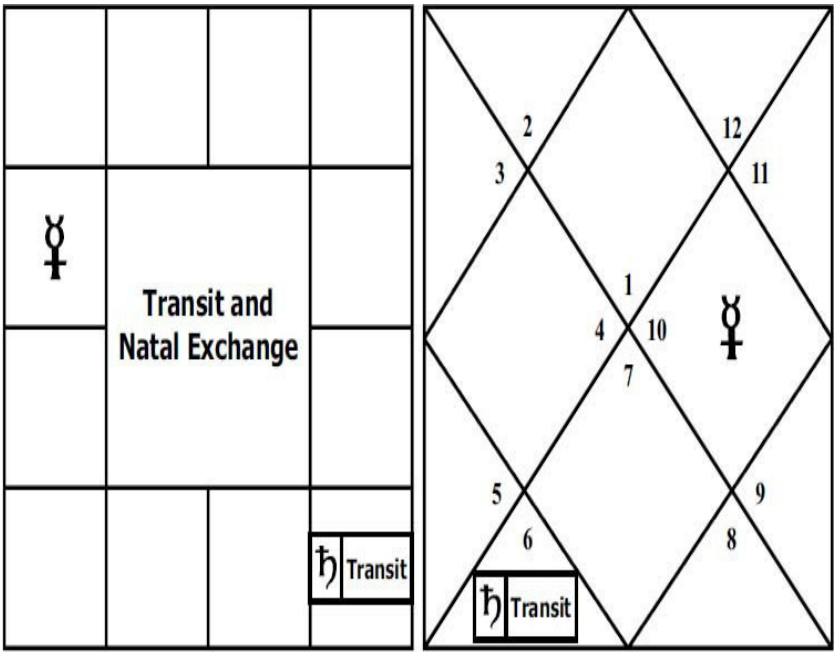

18.The quality of the the results are based on strength of the transiting and natal planets.

## chapter 03

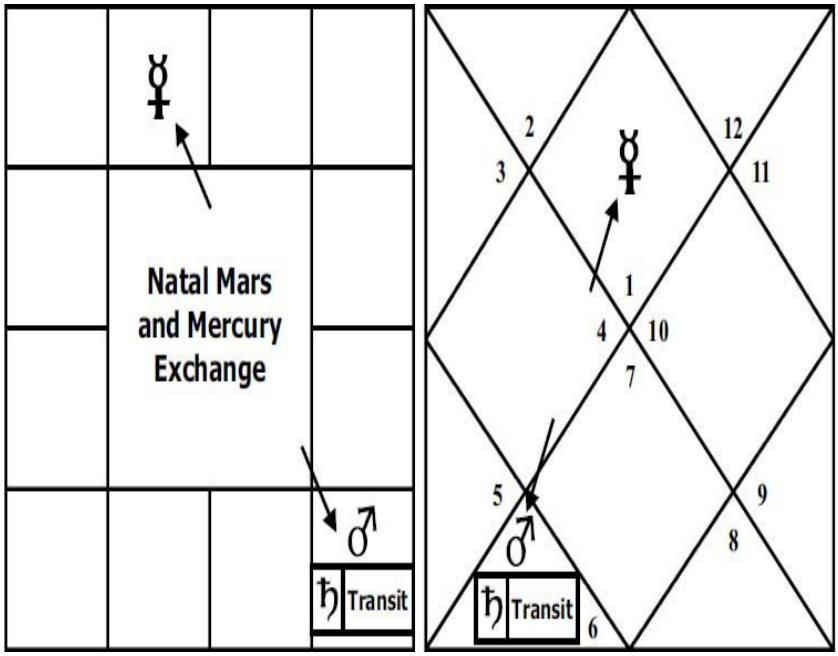

## Additional Transit Rules Suggested

In addition to above classical rules, some experimented rules are being suggested here.

1.If there is a link to Natal planet by exchange with Transting planets, the Transting planet may grant results of Natal planet irrespective of the postion of Natal planet counted from Transting planets.

2.There can be exchange of planets in natal chart. Then a transiting planet will give the result of the sign lord on which it is transiting. Similarly it gives the results of other planets when it reaches one of the signs of other planet.

In example above Saturn transiting in Mercury house will give the results of the Mercury in exchange with the effects of Mars. Education of technical nature. When Saturn transit over Mesha on Mars, he gives mars effect i.e. obstruction to education.

3.The beauty of the Naadi system of astrology is the grouping of the planets especially when the division is categorised as Bhoktr, Karma, Bhoga, and Bhoga Bhanga. The Bhoktr (experiencer that is Jupiter -Jeeva Karaka). The karma (karma is Saturn the effect of past and also effect from present doings). The Bhoga is represented by two other planets one is Buddhi Bhoga i.e. Mercury another is Ananda Bhoga i.e. Venus these two are the resultant factors of karma which has identification factor hence will encircle Atman (Sun). Buddhi and Bhoga are called as Vasanas in Indian philosophy. This Atman (the Sun) is also a visibility factor or recognition factor therefore the Bhoga is consisting of the Keerti also. So Buddhi, Bhoga & Keerti is represented by Mercury, Venus and Sun. Saturn is the Son of Sun. Saturn supports two other planets of the same group i.e. Mercury and Venus. Whenever there is a link between Saturn and any of these two planets there is a factor of fate involving Buddhi & Bhoga. Ironically both these planets are closely associated with the movement of Sun. Saturn is blood relation of Sun and these Bhoga planets are closely related to Sun therefore whenever Saturn transits on any one of these planets there will be cognisable beneficial effects of knowledge and pleasures.

-

**Very Important Secret Note: Sun Mercury and Venus shall be either together or they shall be in 2, 12 or 3, 11 to each other. Therefore any transiting planet on any one of Sun, Mercury or Venus, may get the significations of all the three. The intensity may vary when it is in 3, 11.**

-

My personal opinion is that Indian Astrology is a gift from great Rishis. With biased belief systems, compartmentalisation of subject might have taken place patronizing them individually. Therefore, be it traditional or Naadi or Jaimini or any other ancient text from Rishis, cannot be contradictory on the other hand it should be complimentary. The abstract quick method of prediction in Naadi needs profound fundamental study of classical approach. Especially this is true in Transit results to differentiate the major transit of planets to different Lagna.

4.Dasha running for each Lagna and the dignities of Dasha Lord whether disposed to give good or bad results needs consideration to decide the intensity of good or bad effect of Transit results of planets in Naadi.

5.It is illogical to think that Dasha Bhukti gives indicating the bad period and while the Naadi Transit gives good results.

6.During a period of Bad Dasha Bhukti, good Naadi transit may have given ignorable good results and vice versa.

(For better understanding the aspect of Good and Bad Dasha please Read the book “Vedic Nādi Secrets in Śāstrī ya Jyōtish a”)

Beyond rules the personal experiences the Sadhana of an Astrologer is more imporatant and it is the Anugraha of Graha that gives the Vaksiddhi to pronounce the right results.

**(Sat + Sat = (Mer/Ven/Rah)**

***Saturn quite contrary to traditional opinion he is fate and fortune giving planet. To be more precise he is the one who delivers like a post man the results of past birth either good or bad. Therefore he is actually an eye opening agent for the native. In fact he being the signification of karma in my opinion we should equate him with Lord Krishna. The general evil of the word "Shani" by so called "Astro-Pundits" and the temple pujaris needs to be redefined as he is also referred to as "Shanaishwara"(also addressed as "Shanaishchara" meaning slow moving). Shani + Isha + Vara (Shanaishwara) etymologically it means (considering Shani as noun) "The one with the capability of excellence or the ruler of choices, blessings and boons"Ishwara is also means God it could be Lord Shiva or the lord Vishnu. From all point of view the planet Shani is embodied with the qualities of Divine nature. In some of the ancient texts he is also referred to as "Graha Chakravarty" while Sun is called "Graha Raja". This gives a wonderful concept and the benevolent nature of Saturn who represents our own karma. Mysteriously he is attributed with ugly, sorrowful and dreadful significations. The Sun as Graha Raja also represents Governing and Punishments despite having significations of Ruler/King/Father dignity etc., In classical Astrological texts this Graha Raja "Sun" is considered as Natural malefic for bhava analysis. In epics he is equated with "Narayana" and also represents Lord Shiva as deity. Being the Son of this Graha Raja, Saturn beholds the title as Chakravarty who has responsibility of governing the population and guide them for solvation. He is also called "Yamagrajam" meaning he is elder brother to the deity Lord Yama who accords punishments to sinful persons. Being an elder brother having the qualities with the capability of excellence or the ruler of choices, blessings and boons" he guides us to realise or relish our karma to clear the past debts to avoid the punishments by Yama after death. We must bow down with reverence to his feet and adore, appreciate, glorify, praise, worship and please him at par with Lord Vishnu or Shiva and discard all that ugly superstitious attributes.***

## Destiney Breakers (Modifiers) Link

**SAT Over KET + Natal RAH**

It is similar Saturn over Rahu and also on Natal Ketu earlier explained. The transit Saturn once crosses Ketu will be viewing Rahu in opposition. Then the Ketu and the planets being linked to Ketu also to be taken into consideration.

Native basically, may have plans to leave the present work and get involved in foreign related activities. Or he may drift away from traditional values and resort to unethical activities. He may face hurdles and work may get piled up. He may show disinterest in completing the job as he will be under different mood to function elsewhere. There could be complex health issues. The diseases can be guessed by the help of planets involved with Ketu and Rahu that are triggering the Karma planet Saturn. **In a female chart this transit may give very deep meaning. Saturn the other person is linked to Ketu the Bandhana planet. The Same Saturn is linking Mars the husband karaka. Both being enemies, if married, there could be third person involvement which may cause disputes.**

**One of the sister of the native may have professional problems. She may also get entangled with a working person in some relationship. This can also cause problem in her personal life. She may be having health issues.**

## SAT Over KET linking Other Natal Planets for important matters of life

**Native Orientation**

**(Sat + Ket)**

Native may develop aversion and prefers to get rid of work. He on the pretext of seeking spirituality may behave unconcerned. He also develops a sort of stubbornness. There could be disputes on several issues. He may be interested in occult subjects. He may also show interest in Ketu related activities. (See the significations of Ketu)

**Learning & Earning**

**(Sat + Ket + (Mer/Sat)**

Native will face obstructions and non-progressive tendencies towards education. If there is a shift in the line of learning which relates to Ketu for example occult subjects, healing related, handicrafts and law related subjects he might with little obstruction pursue these educations. In other subjects he might get a sort of rejection and quitting tendencies.

**Mukti has no right meaning in other languages especially in English which generally read as liberation. Accepting that inaccurate meaning we can conclude imaginatively that this combination arising out of Saturn transiting over natal Ketu may liberate him from karma which does not mean Mukti. Importing significations of learning law, medicine, occult subjects may interest him. Similarly any activities of Ketu may attract him. This also does not purport the real meaning of Mukti. Ketu is a wall as described Guruji late Sri R. G Rao who is the sole author of this system. A wall means an obstruction to experience the matters existing on the other sides of wall. A wall or a structure which also seen in hurdle races making obstructive process in race winning. Therefore attributing Ketu totally against profession is absolute nonsense. Ketu indicates Nano particles or deep rooted matters therefore this transit may make native get interested in Nano technology or something related to deep rooted knowledge. Of course when there is hurdles in professional achievements a person may get depressed or disgusted to face frequent hurdle race. In these circumstances the stupidity and ego planet Mars also intervenes then emerges the haste decision to quit the job due to lack of intelligence, advice, and protection**

**Wealth & Assets**

**(Sat + Ket (Mer/Ven)**

Conflicting confluence of Saturn (fate) and Ketu (fugitive) makes a scenario of non-enjoyment. This deprives natives ability to accumulate luxurious wealth, if at all the transits supports wealth it would be limited in its luxury and appearance. He might restrict or refrain from elaborative comfort zones. He may either have small and narrow lands or he may have disputes in landed deals. He may opt for compact house situated near a narrow place or he may have litigations in housing matters. Native may prefer to have ordinary vehicles. Native may be involved some sort of legal issues.

**Male Marriage**

**(Sat + Ket + (Ven)**

**Note: The most confusing and contradicting quality rather signification of Ketu in relation matter needs situational, logical, environmental, personal perception to pick the right signification between moksha and Bandhana. We present a unified field of logic giving same meaning to moksha and Bandhana. Unless there is a Bandhana there is no moksha therefore, the first duty of this planet to create Bandhana then drive the native towards non-materialistic and de-link the Bandhana leading it to moksha. That is why it is a planet that creates distaste in materialistic pleasures. Astrologically an astrologer though indicates an obstruction in the marriage it also supports a Bandhana yoga. We have been repeatedly establishing that the great Chakravarty of planetary family Saturn bestows a results according to fate therefore when such planet is involved in a ceremony of marriage with the influence of Ketu it is a clear cut close up shot of realisation through marriage.**

So naturally native would face a female who is practically spiritual in nature not interested in material performances hence the native would feel the distance in relationship. The appearance of the bridegroom may have a short stature below the belt and a longer figure above the waist. She may have altered colour texture, she may look gloomy and lethargic. The marriage hall may have some religious sanctity or there could be temples, mutts and spiritual institutions around it. One of the most dissatisfactory thing is food, there could be shortage of food or the place of serving food may be congested. Root vegetables are used in cocking. There could be many dishes having soar taste. There could be tiny items. There could be dissatisfaction from the guests though none of the comments would come to surface.

**Female Marriage**

**(Sat + Ket + (Mar)**

It is an indication of Karma bandhana. The timid mentalities and appearances behaviour are dominantly visible with the bridegroom side. Often you find a gap of communication between the bride and bridegroom families. There will be several occasions where the process of marriage is getting obstructed. You will find ordinary attendance. The food will be spicy and may spoil the digestive system. There will be small fried items with spicy touch which may get consumed inviting no comments. Generally it is very hard to forget this marriage incident. The Groom looks gloomy and expresses displeasure in every act of marriage.

**Progeny**

**(Sat + Ket + (Jup/Sun + Ven)**

Active movements in the womb and the sensations to mother are common symptoms of pregnancy. Contrary to this “Jadatwa”(cannot get right meaning in English- could be inert) is the major signification of Ketu. Therefore, for progeny matters involvement of Ketu is not conducive.

Despite by remedial measures (both medical and spiritual) if luck favoured forcing Saturn to give a child it may not be without attached troubles. Delivery needs proper care with modern and traditional approaches

**Health**

Saturn is air especially the air which passes through air tube, Ketu is obstruction so native is bound to feel some obstructive breathing syndrome. Saturn being a digestive planet Ketu being blocker often indigestion problem may arise. Ketu indicates growths, indigestion also causes acidic accumulations therefore ulcers and growths are also indicated. Saturn also indicates locomotive parts Ketu is obstructive planet therefore joint pains and pains during mobility are inevitable.

**Other Persons**

**(Sat + Ket)**

At the work field native will meet or may have to face persons who do not help in active progressive works. Mostly he meets persons who grumble to put efforts. Above all he himself prefers to abscond from work and naturally he faces only such persons in his work area. He may also come across priests or religious heads.

**Vastu**

**(Sat + Ket + (Ven)**

Native if planning to shift his working area he might get a narrow accommodation or there could be a narrow approach to his building or there could be a Ganapati or Shiva temple nearby. There could be burial ground or hospital nearby or it might be situated near a legal institution. It may also have stair case back side of his house or towards the western side. He may find steps or a wall obstructing the bedroom.

**Food liking**

**(Sat + Ket + (Moo)**

Native may get inclined or develop taste in foods like roots, seasoning salts. He may develop taste for Chinese foods or foods that are preferred in temples or the one that is preferred by monks and saints. Small fried items like Manchuria etc., are also of interest to the native. He may prefer to have food in compact food joints. He may prefer to have

drinks using straws. He may like food served in clay cutlery. He may like cold food or serving food may be delayed.

**Visuals in Dream, Real, Photo, Arts or Idols**

**(Sat + Ket + (Rah Moo)**

Native may find in dream/real/photo/arts/idols insects, lizard, rat, pet dog, deer, elephant, horse, mongoose and squirrel. If the finds insects he will have irritating situation in the profession. If he finds a lizard he will get aversion towards work. If he gets rats he will hide away from the work. If he sees a pet dog he will seek sympathy. If he gets deer he prefers to work in clean environment. If he sees an elephant he has a huge task to complete. If he sees a horse he is riding towards success. If he sees a mongoose he may find opposition. If he sees a squirrel he would like to serve people.

**Remedies**

If Saturn is weak in transit he should wear a blue sapphire of 4 carats in gold after performing necessary puja for it. He should go to temple of Lord Hanuman and make Pradakhsina Namaskaras 108 times. He should Donate sesame (1.25 kgs) duly soaked a day before and Jaggery (600 grams) to it and feed cow on Saturdays. He should recite Hanuman Chalisa every day.

If none of the positive significations of Ketu are beneficial to the native, it is better to wear a cat’s eye of 4 carats to the Saturn finger on Saturday after Pranapratishtapana and visit Ganapati temple. Recite on Saturdays and Wednesdays Ganapati Atharwa Sheersha 12 times and feed cow on these two days 1.25 kgs of horse gram soaked duly and 1.25 black sesame, add 1.350 kgs Jaggery. Daily visit hanuman temple and make 21 Namaskaras.

The beauty of transits is unique. It has its own logic in giving results. Because same planet has many things to accomplish during a transit, it selects such a place where it can have strength to give major results and also can give other results during that period. The intellilgence of Naadi astrologer lies in his logic to index the priorities of results and select the strong places to predict the results. Here when Jupiter transit over Jupiter there should be a child birth. Karma should decide the type of childbirth. However in the natal birth chart Sun is debilitated but with exalted Saturn. This is the wonderful effect. By karma of Wife he should get a male child. Jupiter being in Jupiter's own place of Jeeva Sagittarius with Mars also indicate a male child. In Transit Saturn's commitment to give male child is fulfilled when Transit Saturn was transiting on Natal Sun and Saturn. Equally, Jupiter should have performed his duty while in Gemini having aspect to Natal Jupiter. But he did not, because Gemini is a not a strong place for Jupiter and especially for child birth the Mercury place is not that sound. Hence he preferred to cross Gemini and gain his exalted position and he has indicated clearly that it is due to wife's luck he gets a male child by linking transit Venus and transit Sun along with him in his exalted place.

Saturn did not give house during transiting in Vrishabha. The simple reason is that Saturn gets linked to Natal Ket in Vrishabha Transit Jupiter from Kumbha links Transit Saturn is in Mithuna which shall be a strong point for Saturn to accord wealth to Native by fortune. The simplest rule is that Saturn when gives something, he invariably links Jeevakarka for experiencing the results of Saturn. Similarly if Jeevakarka is to bestow results as per the Karma, then Jupiter shall have link to Saturn either Natal or Transit.

# Remedies - Gem Stone Clarification

The Gemstones in Naadi are prescribed for two reasons.

1.For a debilitated planet to get its wavelength for its positive Karakatwa.

2.For Destiny breakers to prevent its negative effects of Karakatwa.

Generally except Cats eye, Pearl, Coral and partially Hessonite other gems are transparent. That is Ruby, Emerald, Yellow sapphire, Diamond, Blue sapphire are assigned for planet Sun, Mercury, Jupiter, Venus and Saturn. In this despite Diamond being non transparent, it is categorised under transparent due to its brilliance. These five gemstones are generally worn to improve their significations that is Karakatwa when they are debilitated. In destiny breakers Moon, Mars are worn for both to prevent negative effects and also improve positive effect when they are debilitated. Ketu is worn only to prevent its negative effects. Hessonite is worn for both to prevent negative effect and also to get the beneficial results of Rahu.

Therefore proper Pranapratishtapana along with the purpose for which it is being worn needs to be initiated in the sankalpa.

1.If the gem is being worn for improving its Karakatwa

After other sankalpa include

□. □□□□ □□□□□□□ □□□□□□□□□□□□□ (.....) □□□□□ (.....) □□□□ □□□□□□□□ □□□□□□□□ □□

2.If the gem is being worn to prevent its negative effect

After other sankalpa include

□. □□□□ □□□□□□□□ □□□ □□□□□□□□□□ (.....) □□□□□ (.....) □□□□ □□□ □□□□□

In the dots first give the name of gemstone and in the 2nd doted lines give name of the planet.

It would be more precise if the specific Karakatwa or guna is specified.

The Gems are to be prescribed for their significations. In the traditional astrology the method is more or less same and will publish separate book on this gem remedies.
